Metropolitan Transportation Authority Subway Entrance & Exit Data Overview

General Description

This data file provides a variety of information on subway station entrances and exits which includes but limited to: Division, Line, Station Name, Longitude and Latitude coordinates of entrances/exits.

Data Collection Methodology

This data is updated on an as needed basis. The New York City Transit Operations Planning department updates their database as new or updated information about an entrance or exit required.

Statistical and Analytic Issues

Service (route) information is updated.
Entrances are updated for various stations.
Station names are exactly the same as represented on the subway handout map.
Complex stations have all routes serving the complex listed.
ADA stations are updated.
Entry and Exit Only data is simplified.
Free Crossover and Entrance Staffing are introduced.

Limitations of Data Use

These entrances are represented as accurately as possible but mistakes or errors may be found. Some of the fields may change post release of this information; efforts will be made to update when necessary. Some other fields may contain information that changes due to a situation not present or obvious at time of data release (such as an elevator or escalator being out of service; an entrance closed for temporary or permanent reason, staffing is reduced at a station, etc.).
